How to enjoy the strawberries of Chiba Prefecture 2018

Sweet temptation

CHI-BA+BERRY Strawberries

CHI-BA+BERRY strawberries, a Chiba Prefecture original variety, were developed over a long period of time by the Chiba Prefectural Agriculture and Forestry Research Center.

They are as big as your palm and considerably weighty. These strawberries are exquisite delicacies, and are so big that they should be enjoyed slowly one-by-one.

The berries are as vividly colored as jewels and red to the core. Just one bite and the mature flavor leaves a sweet impression.

Chiba Prefectural Agriculture and Forestry Research Center
Ms. Fumi Maeda

An Interview with the Originator of CHI-BA+BERRY Strawberries

How were CHI-BA+BERRY strawberries created? Where can I go to taste and purchase them?

Development of CHI-BA+BERRY strawberries began from 2005 with the goal of making them large, delicious and resistant to disease. They were finally ready for release to the public in 2017. Currently, there is limited availability. They are a super rare variety that are only sold at a handful of farms within Chiba Prefecture.

CHI-BA+BERRY strawberries are delicious, but are there any tricks to make them even more delicious? How should they be eaten?

CHI-BA+BERRY strawberries are juicy and flavorful variety, and we designed them to become particularly sweet after long periods of good weather. They can be fully appreciated by eating them starting from the crown as the last bite will fill your mouth with strawberry sweetness.

CHI-BA+BERRY

A Selection of 15 Strawberry Picking and Farmer's Market

In Chiba Prefecture, there are approximately 100 locations that allow strawberry picking. The draw is being able to taste fully ripe and sweetened strawberries on the spot. Other joys exclusive to "strawberry picking" are coming across rare varieties and enjoying taste comparisons of the different varieties.

Strawberry varieties and growing conditions vary by farm.

The glossy, faintly red berries are smallish and sweet.

Characterized by a refreshing peach aroma. Highly sweet with very little acidity.

The flavor is soft and amply sweet. Shaped like a longish cone.

The berries are large, vividly red and special because even the flesh is red.

Features a deep red color. Highly-sweet, full-bodied flavor. High rarity value.

Check before you leave home!

5 techniques for successful strawberry picking

To find delicious strawberries, pay attention to the green leafy crown!

It is best if the crown is a deep green with the leaves bending upward. The berry is swollen to the point that it covers the seeds.

If you want to eat a lot, then use condensed milk and sauce at the end.

First, enjoy the juiciness of freshly picked strawberries! Toppings make you surprisingly full.

Aim for the morning so you can enjoy the stirring deliciousness of "morning-picked" strawberries.

Ripe strawberries picked first thing in the morning contain few distracting flavors and are delicious as is.

You can savor the deliciousness by eating from the crown first!

The tip is the sweetest part, so eating the strongly acidic crown first ensures that the last bite is the sweetest.

It is surprisingly hot inside the greenhouses. Wear clothing that is easy to remove.

It is particularly hot on clear days. One idea is to wear a jacket that can be tied around the waist to keep your hands free.

Three points of etiquette when picking strawberries

- 1 Do not be late for your reservation! Some locations are difficult to find even with a car navigation system. It can cause problems for the farm and other guests if you are late, so leave home early as you may get stuck in traffic.
- 2 Only pick as much as you can eat! An important rule when picking strawberries is to only pick as much as you can eat on the spot. Eat the one you just picked before moving on the next one. Do not pick more than one at a time!
- 3 You must not step on seedlings or pull on vines. Children, in particular, sometimes unexpectedly harm seedlings. This causes painstakingly-grown strawberries to wither, so be careful not to harm the seedlings.
